## Project Title: Nintendo Wii Website

I would like to build this site as multiple pages, rather than a long, single page website. Typical site navigation will be probably across the top or use a drop down menu bar in the left/right corner. I know there will be plenty of content and photography to build out individual pages.

- **Home Page/Introduction** – introduce the basics of the Wii, its history, its aesthetic, and its legacy. Set the tone and the graphics.
- **History/Name**
- **Wii Remote** – details on the construction, innovation, and features
- **Wii Menu** – summary of the television channel graphic shell and short summaries of the different channels
- **Demographic** – wider demographic than usual Nintendo products with getting new people to play games
- **Launch** – announcement and selling out
- **Reception/Sales** – summary of the reviews and the general sales
- **Sources** – this page will just list sources, including the wikipedia page, as well as other sources for photography, and other sources that need to be provided
